

NICMAR

PLACEMENT 2011-12

NATIONAL INSTITUTE OF CONSTRUCTION MANAGEMENT AND RESEARCH PUNE

NICMAR

National Institute of Construction Management and Research (NICMAR) is a leading educational Institute established by the Indian Construction Industry. NICMAR is an autonomous, non-government, non-profit academic body, incorporated in India in September 1983 as a 'Society' and a public charitable 'Trust'. It is recognized by Government of India as a Scientific and Industrial Research Organization (SIRO). Major academic programmes of the institute were started with technical assistance from UNDP and academic inputs from the faculty of MIT-USA, University of Michigan USA, ILO and Indian Institute of Management, Ahmedabad. NICMAR, was conceived not only as a business school but also as an institute that would provide capabilities to students to work with diverse organisations in the modern world. The sheer diversity of Indian economy and society, whose different shades are represented among the students and faculty, prepares the students to work in global multicultural corporations serving diverse markets. NICMAR has maintained about hundred percent placement record, even though a majority of students come to the Institute without any past experience. The graduates of NICMAR have been selected by some of Asia's leading companies in both private and public sector.

NICMAR PUNE

NICMAR Pune Campus is situated at Balewadi, seventeen km from the Pune Central Railway Station and seven km from Pune University and the Expressway to Bangalore runs along the Institute. It has about two and half lakh sq.ft built up area on an 11 acre plot of land, using latest materials and technologies having state-of-the-art facilities that blend harmoniously with the landscaped greenery all around.

PHYSICAL INFRASTRUCTURE OF THE CAMPUS INCLUDES:

Work area for 700 students, 60 faculty and scholars and 100 support staff, classrooms, seminar rooms, tutorial rooms, Faculty cabin, offices. Library with 15,000 titles, 80 periodicals, 4000 full text e-journals subscribed from Proquest, ASCE, Science direct and a complete online information on Indian Macroeconomy from CMIE. Along with these are stack areas, reference sections, documentation centre and scholar cabins.

Computer centers for 300 people each to work at a time, provision of computer on every desk and in every room in hostels with total Wi-Fi connectivity, internet round the clock, chat rooms and recording and transmission facilities.

A guest house, a modern and well appointed kitchen with capacity to serve 1,000 meals per day, students and faculty dining rooms and staff housing units. Other facilities include solar heating, waste water recycling plant, Doctor on request, M.I. room, First-aid stations, and indoor and outdoor recreation infrastructure.

NICMAR

NATIONAL INSTITUTE OF CONSTRUCTION MANAGEMENT AND RESEARCH

Post Graduate Programme in Advanced
Construction Management (PGP-ACM)]
Batch 24

Post Graduate Programme in Project Engineering
and Management (PGP-PEM)
Batch 6

Post Graduate Programme in Real Estate and Urban
Infrastructure Management (PGP-REUIM)
Batch 2

MISSION

The mission of NICMAR is to serve national and international clientele, preparing students for excellence in thinking, learning, service and research. Quality, Integrity and service to the society are the core values of NICMAR.

VISION

To evolve as a full-fledged, specialised institute of management, focusing on state-of-the-art education by imparting knowledge, skills and professional wisdom to all participants through full time courses, research and consultancy, executive training and distance education.

ADDRESS BY THE DIRECTOR GENERAL

"The National Institute of Construction Management and Research (NICMAR) has successfully completed over 25 years of its existence. Over the years, Projects Based Industrial Activity has evolved considerably with the advent of new technologies and practices. There has been a conscious effort on the part of NICMAR to adapt to these changes by introducing novel methods of learning to meet the requirements of the industry. Through what we believe is unique programme, NICMAR has taken the initiative to cater to the long felt need of professional human resources across a wide range of sectors such as construction, infrastructure, real estate, manufacturing industry, oil and gas exploration, telecommunication services, power, airports, ports and highways.

Our core competencies include expertise in construction management, real estate management, infrastructure management, finance management, equipment management, human resource development, project management, international business and strategic business thinking.

The institute presently offers the following two year full time post graduate programme from the Pune campus, PGP ACM, PGP PEM, PGP REUIM and PGP IFDM. The PGP IFDM programme has been started from the current year and the first batch of the programme will pass out in 2013.

It is my privilege to present the class of 2012, which I strongly believe is nurtured, trained and competent to take up challenges faced by industry. The institute draws the best talent across the country. The batch comprises of 195 students from the Advanced Construction Management (ACM), 105 students from Project Engineering Management (PEM) and 47 students from Real Estate and Urban Infrastructure Management (REUIM).

The Advanced Construction Management programme (ACM) is NICMAR's flagship course, designed to take the best talent from the civil, mechanical and architecture stream and turn them into the industry leader of the future as construction management professional. The Project Engineering and Management (PEM) stream is a pioneering course offered by NICMAR to fulfil the specific need felt by the industry to have more project management professionals on a massive scale.

The Real Estate and Urban Infrastructure Management (REUIM) builds upon the concepts and methodology of management, engineering, architecture, law, information technology, urban economics, behavioural sciences and combines theory with practice.

Our recruiters now include multinational corporations such as Louis Berger group Inc, Al Habtoor Engineering Co. LLC, Al Tayar Group, Al-Futtaim Carillion, Bechtel Corporation Ltd, Currie and Brown, ENVAC, Black and Veatch, JLL Group, Barys, KPMG, OPAL, ICICI housing Finance, BASF, Bharti Realty, FFE Minerals, Chiyoda corp., Honeywell Automation and the "who's who" of the Indian Construction and Project Industry. We are also extremely happy to note a predilection amongst reputed overseas firms to recruit graduates of these programmes.

I invite the industry to take part in the Placement Programme for the class of 2012."

Dr. Mangesh G. Korgaonker
Director General,
NICMAR.

ADDRESS BY THE DEAN- STUDENT PLACEMENT

It is my great pleasure to welcome you for campus recruitment 2012 at NICMAR Pune.

Since 1983, NICMAR has a tradition of imparting management education and create multi disciplinary talent. We have been so far successful to bridge the gap between the global requirement of technomanagerial skills largely in the areas of construction management, project engineering and management and Real estate and urban infrastructure management.

To address the growing demand in yet another industrial sector we have launched a new post graduate programme for this year in Infrastructure Finance, Development and Management (PGP-IFDM). On completion of this programme, students will gain profound knowledge in the areas of project financing, planning, design and evaluation of infrastructure systems including their economic and public aspects. The students of this programme will be ready to face the challenges of the industry from 2013.

This year we have a combined strength of multi disciplinary skilled students of over 500 from all the three campuses i.e. Hyderabad, Pune and Goa. I am sure with your continued support from the stalwarts of the industry we will have yet another year of 100% placement.

The campus recruitment will start in the month of November 2011 in NICMAR and it would be my proud privilege to host your Esteemed Organization in the said placement programme.

I wish all the students, the very best in their career and I am confident they will make a mark in the industry. Look forward to see you at the NICMAR, Pune campus.

Professor Tapash Kumar Ganguli
Dean- Executive Education and Student Placement
NICMAR, Pune

The successful endeavour of NICMAR is combating the problems pertaining to recruitments albeit the economic downturn is noteworthy, Although the impetus of GDP growth rate of the country has come under some strain, the infrastructure development is still in full swing. Real Estate sector is resilient for revival considering the positive signs shown by the markets despite the after effects of the Global Economic turmoil. At such challenging times, engineering expertise with managerial skills and professionals who will be able to maintain equanimity during such meandering economic cycles.

I feel proud to note the feedbacks from some of you about our students working with your organisation. The competency of the multi-disciplinary engineers and architects in handling projects from concept to completion with all the prerequisite ingredients is unquestionable. NICMAR's Post Graduate Programmes are adeptly designed to imbibe techno-managerial skills into its students, enabling them to take complex industrial challenges. In the current dynamic environment where change is inevitable, our Post Graduate Programmes in Advanced Construction Management (PGP - ACM), Project Engineering and Management (PGP - PEM) and Real Estate and Urban Infrastructure Management (PGP - REUIM), have constantly evolved to meet the diversified needs of the industry. Proactive approach, commitment to execute plans within the time frame and pursuit for perfection are some of the hallmarks etched by NICMARians in the industry.

With pride, I present to you the profile of our 24th Batch of PGP ACM, 6th Batch of PGP PEM and 2nd Batch of PGP REUIM for your kind consideration. Our current batch of students is young and dynamic. They possess the conviction, courage and commitment to leave their imprints wherever they serve. With pleasure I invite you at NICMAR, Pune to actively participate in Campus Placement Programme. I am confident that your organisation will benefit immensely from your choice of students from our institute.

Welcome to NICMAR, Pune

Dr. Anil Agarwal
Professor and Dean PGP,
NICMAR, Pune.

National Institute of Construction Management and Research

The course curriculum taught at NICMAR is entrenched in the minds of the students in a holistic manner. The Institute can boast of knowledgeable faculty, both permanent and visiting, with vast and varied experience in the project industry. The methodology of teaching incorporates the case study approach. Seminars take place at the institute on a regular basis, aimed at stimulating students' minds regarding current and management topics.

In addition to the regular teaching at the institute, the students also need to undergo Summer Training and carry out research on mini Thesis, Case Studies and Thesis papers.

SUMMER INTERNSHIP PROJECT

In addition to the core subjects, electives and various workshops, NICMARians also have a project that is undertaken by each student as a Summer Internship Project under the guidance of a mentor of the respective company they are placed in. The projects cover a variety of areas including advisory services, project management consultancy, planning, execution to contracts management the area of work they are assigned.

PROJECT SEMINAR (Mini Thesis)

NICMARians also have a research topic that is undertaken in the form of a mini thesis trimester which mainly comprises of in depth literature review and study that the students are interested in exploring and researching under the guidance of the experienced and able faculty.

CASE STUDY

Case study research project is undertaken by the student. Thus the student is engaged in the sixth trimester to work on a live case with a problem of contemporary or future importance along with a faculty research guide.

THESIS WORK

In final trimester topic is presented as a thesis work in which the students complete as their research thesis work, supplemented with a case study. This is generally an extension of the research carried earlier in the programme.

It is one of the most enriching and self motivating projects that they undertake and the same contributes to the collection of the NICMARians Research Library which is one of its kind in the construction industry.

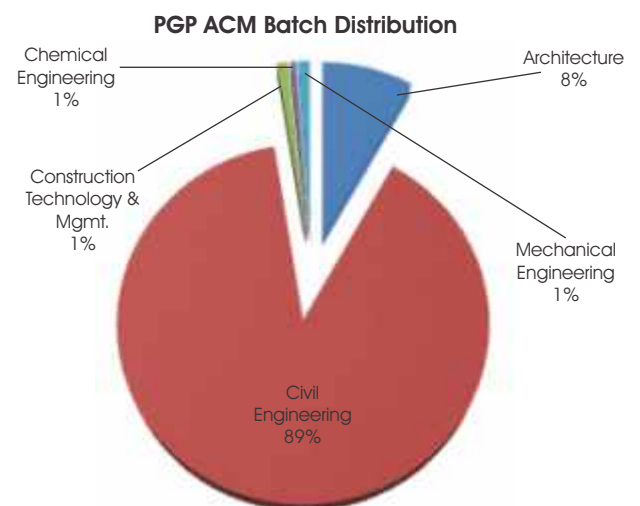

Prof. Anand Gosavi

**Associate Professor / Head - ACM
Pune**

“The Advanced Construction Management (ACM) program was developed in 1983 by NICMAR to support the recruitment and retention of the techno-manager in construction industry by developing their expertise through technical as well as management skills during the post-graduate program. The ACM program focuses on developing the business cases and skills to integrate, manage and provide solutions to construction projects globally and sustainably in complex environment to maximize product value. The ACM program offers two tracks at the postgraduate level: Infrastructure & Real Estate/ Facilities Management. The program’s innovative approach aims to educate practitioners and researchers who can play a variety of roles in planning, designing, building and operating more sustainable buildings and infrastructure”

Prof. Vivek Datey
Professor / Dy. Dean SOPEM

"Top ten Global Project Management Trends for 2011, a survey by ESI International with input from a global panel of consultants and senior executives indicated that Project managers seeking to distinguish themselves in 2011 should hone their leadership skills, and strive to learn more about project management through experience and various informal approaches. Opportunities for PMs should be plentiful in India as it has a dearth of competent and experienced people who can manage large and complex engineering and infrastructure projects. ESI survey further expects to see more reality-based learning and on-the-job training of PM's. Learning providers will be required to send PMs to the job from such sessions with the ability to immediately apply what they learnt to their projects. ESI expects that the organizations will strengthen their risk management cultures and focus on adopting best practices in contract management."

The two year full time post graduate program in Project Engineering & Management (PGP PEM) clearly address the very issues cited above and develops professional project managers capable of solving multifaceted project management problems and to be effective change managers."

"The second batch of the Post Graduate Programme in Real Estate and Urban Infrastructure Management (PGP REUIM) is ready for campus recruitment. This year, we have 47 students, from Engineering and Architecture background. Once again the students, many with past experience will seek appropriate job profiles in leading organisations covering real estate and infrastructure sector particularly in urban areas. Academically, the students have been exposed to project management as well as business management courses and innovative workshops such as Leadership and Design builder. Additionally case based teaching has enabled them to acquire analytical and problem solving skills. Welcome to REUIM Placement 2012!"

"As an ex-NICMAR graduate my visit to the Pune campus for campus interview was both a daunting and proud moment. The attitude and spirit of the multi-talented students made our selection process rather difficult. The young graduates, we chose, have excelled in their roles and have shown tremendous enthusiasm, spirit to learn and have seamlessly blended into our multi-cultural organisation and lived up to the skill sets demanded for their roles. NICMAR is definitely the one stop shop for those in search in the construction and engineering industry for the future manager."

- Mr. Ramnath Venkateswaran

Business Development Manager, ENVAC Middle East FZE, Dubai

"We are very much impressed with the sincerity, adaptability and learning attitude expressed by the NICMAR students while they were on the job, which demanded multi-skilled approach in the multinational construction environment. I believe they have a strong potential to reach the level of "Project Management Leaders" on the multinational construction platform. I wish them the very best in their future endeavours."

- Mr. Jafar Khair

Corporate Planning Director; Habtoor Leighton Group, UAE

NICMAR as an Institute over a period of time has become synonymous with Quality & Professionalism. We have been visiting the Campus for many years and this institution has contributed significantly not only to our yearly Talent requirements but also indirectly helping us in building a strong talent pool and future leaders. The overall grooming along with the Technical & Management Skills with which the students of this institute come in is indeed a strength. It has been a pleasure to visit the campus. "

- Mr. Aditya Jain Group

EVP -Human Resources , Hindustan Construction Company Ltd

We have been recruiting NICMARIANS for many years. They are proved to be good choice for our front-line operations at project sites as well as at various offices. NICMAR students moved quickly in the organization. Also we had tried NICMAR students as interns. Looking at their performance we have extended pre placement offers and absorbed them.

NICMAR is pioneer in construction management education and I respect its value education and innovative processes.

- Mr. DP DAS

DGM - Human Resources, Divisional Corporate HR, L & TECC

"NICMARians have fulfilled their responsibilities well and took initiative in works assigned to them. Their behaviour has been good and cordial and they have gelled well with the site team. Their learning capabilities are good and all the reporting officers are happy with their performance."

- Mr. Basant K. Bhatnagar

VP-Construction (Building), GMR Projects Pvt Ltd

GUIDELINES TO THE RECRUITERS

All communications regarding Final Placement 2011-2012 must be carried out through the Placement Committee.

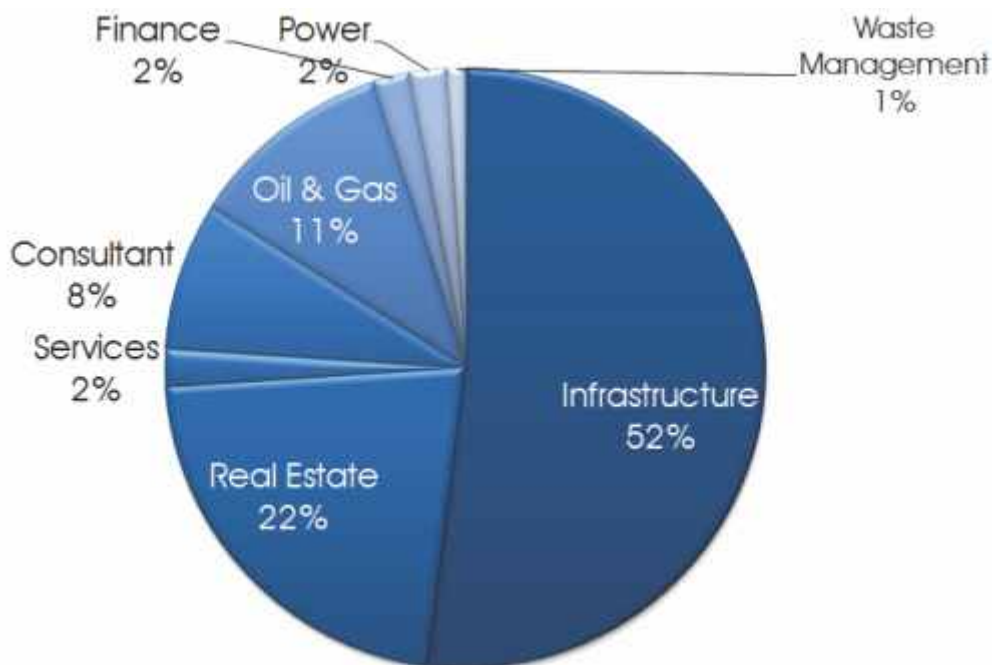

Organisations are required to send the duly filled response sheets at the earliest, so that the interested candidates may be informed in advance about the company's requirements and procedures.

The participating organisation will be allocated specific date and time for conducting pre-placement talks and the selection process, considering the preference of the organization and the institute.

After the pre-placement talks, the interested students appear for further formalities of the selection process, such as preliminary tests, group discussion and personal interview as per company requirement. The names of selected candidates are announced on the spot and an offer is made to them.

The participating organisation should send their representative with full authority to declare the results of the recruitment process and make the offer to the selected candidates immediately after the interview is over. They are also required to provide a waiting list of probable candidate.

PREVIOUS PLACEMENTS

Sectorwise Placement 2010-11

"What makes NICMAR a truly alive and cheerful place, is the various clubs and events organised by the students making the institute a continuously improving consortium."

CELEBRATIONS AT NICMAR

At NICMAR, we celebrate, respect and rejoice at various occasions, be it national festivals like, Independence Day and Republic Day or cultural festivals like Onam, Christmas, Ugadhi, Ganesh Utsav, Janmashtami, Navaratri, Shiv jayanti and many more. Every festive occasion is celebrated with great exuberance by the entire student body, testifying the fact that NICMAR believes in unity of diversified cultures and belief. "Every festival in our nation, irrespective of the religious backdrop, epitomizes something significant."

TECHNIKALLAH

NICMAR's youth festival initiated in the year 2005 has evolved into a three-day management and cultural event. Its reputation secured as one of the city's prominent technical and cultural fests. Technikallah boasts to be NICMAR's brain child, an idea fully conceived and executed by students. This celebration witnesses hundreds of delegates every year from numerous B-schools and Technical Colleges across the nation. The event is revolutionary in many senses, with a mix of technical and literary events, electric cultural performances & art, all considered. With each passing year, the extravaganza has reinvented itself in concept and rendition. The years that followed since 2005 were perhaps the best in NICMAR's history as an enterprising undertaking.

RESEARCH AND PUBLICATIONS

A quarterly journal "NICMAR Journal of Construction Management (NJCM)" - Reg. No. ISSN 0970-3675 is devoted to the study and practice of management in the construction industry and Infrastructure development sector. NICMAR has many cases, Books, Directories, Journals, Technical Papers, Periodicals & Newsletters published regularly by the faculty and students. In last one year NICMAR has published about 50 Research Papers, 26 cases and many more.

PHILANTHROPIC ACTIVITIES

Every year, on Independence Day, the institute organizes a blood donation camp, where hundreds of voluntary donors donate blood, which is delivered to the hospitals. A charitable attempt is made voluntarily, by the students, every year to collect money and clothing from the students and donate them to authorized orphanages.
